## Revolutionizing Smart Access Control

### INSTALLATION:

Easily integrates into your existing entrance mechanisms. The sleek design ensures seamless integration without compromising on functionality.

### DOWNLOAD THE APP:

Available from the iOS App Store, Google Play and Huawei AppGallery.

### CONTROL AT YOUR FINGERTIPS:

Securely open or close entrances remotely or within bluetooth range, with a simple tap.

### ACCESS MANAGEMENT:

Ability to grant various types of secure, encrypted access.

### ACCESS LOGS:

Stay informed and in control.

# Fluss+

an IoT device that seamlessly integrates with a cloud-based Software as a Service (SaaS) platform.

Make any entrance smart! By utilising **Bluetooth** or **Wi-Fi** connectivity, you can now transform ordinary entrances into **smart, secure** access points.

Whether it's your gate motor, garage motor, swing gate, boom gate, turnstile, alarm systems and beyond, **Fluss+** brings **convenience** and **security** to your fingertips.

### Bluetooth and Wi-Fi Connectivity

Seamlessly connect via Bluetooth or Wi-Fi for enhanced accessibility.

### User-Friendly Interface

Intuitive app interface designed for ease of use, ensuring hassle-free operation.

### Secure Encryption

Rest easy knowing that your data is encrypted, POPIA and GDPR compliant, providing peace of mind against unauthorized access.

Moving the world towards smart access control.

## Some more incredible features

### Operating system

**iOS, Android or Huawei:**  
No need to buy or carry multiple remotes. Now you'll have easy access on any modern smartphone.

### Encryption

**Latest Encryption Standards:**  
Trusted encryption standards that protect you from gaining unauthorized access.

### Connectivity

**No Airtime Needed:**  
Gain access even when you have no airtime or data and works when there is no signal.

### Verification

**Verified Users:**  
Users are verified using mobile numbers and an OTP to ensure they are who they claim to be.

## Technical specifications

Operating Frequency	2.4 GHz
Communication	Bluetooth LE and 2.4Ghz Wi-Fi
Input Voltage	3.7 to 28 VDC
Switch Type	Normally Open (NO) Negative Pulse
Switching Current	Up to 500mA
Operation Current (average)	70mA
Operating Temperature	-10°C to 95°C
Users per device	Unlimited
Enclosure	ABS
Approval	ICASA Type Certified
Operating Systems	Android, Huawei, iOS
