

# 01-135 Mercury switch 5 x 18mm

## SPECIFICATIONS:

The Switch is designed for electric appliances between 1.2V to 14V with the current from 30MA to 1Amp. 100,000 Interruptions quarranted within the designed range, nevertheless, a higher voltage/ampereage may be used within the following suggested ranges.

MAX. Voltage 220V AC/DC (Current not exceed 500MA) MAX. Current 3Amp. (Voltage not exceed 6V) The Switch is also designed starting operation at a gradient of at least 10 degrees.

Furthermore, please be advised that the Switch has a resistance of 0.04 Ohm at 1.5V DC. Therefore, the Switch is not recomanded for the appliance of current under 20MA.

## CAUTION:

Whenever the Switch stocked, please keep it as per the sketch hereright, Otherwise, the electrode may be oxided by mercury.
