Xwave Wireless 16 Zone Expander (860-07-563)

Description

Developed by IDS

The Xwave Wireless Zone Expander makes the X-Series control panels incredibly versatile, providing all the benefits of a fully supervised solution. Xwave transmitters are factory fitted into the complete range of Optex detectors. With its simple 4-wire bus connection, the receiver can be installed anywhere on the key bus to maximize range. Any combination of wired or wireless zones can be used making the X-Series control panels a true hybrid solution.

FEATURES

• All wireless detectors are fully supervised

• RF Jamming supervision

• Detector signal strength testing

• Approximate range of 100m line of sight between detectors and receiver

• Receivers can be installed anywhere on the bus to optimise installation effectiveness

• All programming done from the X-Series keypad or IDSwift2

• Auto code learn

• 2 Onboard outputs

• Xwave transmitters are factory fitted into the complete range of OPTEX detectors
