

Spot welding machine SWM-10

Introduction

The SWM-10 is a portable handheld spot welding machine that is efficient, convenient and easy to carry. The double pulse spot welding technology is adopted to make the welding more stable and firm, and it also can be used as 5000mAh power bank.

- Welding parameters can be adjusted according to different materials and thicknesses
- 1200A instant current achieves perfect welding performance
- Power bank + Electric welding machine

Features

FNIRSI | SWM-10
Portable intelligent color screen spot welding machine

PORTABLE INTELLIGENT COLOR SCREEN SPOT WELDING MACHINE

- MULTIPLE SECURITY PROTECTION REMINDERS
- SPECIAL SPOT WELDING PEN
- 1200A CURRENT DISCHARGE
- INTELLIGENT ANTI-BURNING

Technical Specifications

Welding current	1200A MAX
Welding materials	Nickel sheet, iron sheet, stainless steel
Welding thickness	0.1~0.25mm
Battery	3.7V / 5000mAh lithium battery
Charging / discharging	5V/2.1A
Pulse duration	0~30ms
Pulse interval time	0~20ms
Number of welds	1, 2, 3, 4, 5
Screen	1.8-inch TFT color screen

General Characteristics

Product net weight	300g
Product size	155*82*29mm
Standard carton	61.5*35*43.5cm
Carton gross weight	29kg
Quantity per carton	50PCS
