

## Two-way intelligent HDMI1.4 switcher, two in and one out 4K\*2K

### **[Product alias]**

Two-way HDMI video switcher, two-way intelligent HDMI video distribution switcher, two-way HDMI switcher 4K

### **[Product introduction]**

This two-way smart switch is both a two-in and one-out HDMI switch and a one-in and two-out HDMI splitter. A high-definition 4K audio and video splitter that can distribute two HDMI ports from one HDMI port, or a high-definition 4K audio and video switcher that can be input from two HDMI ports and output from one HDMI port, just through the buttons on the product, you can easily Realize the conversion between the switcher and the distributor. It can make the HDMI signal of high-definition TV set-top boxes, DVD players, D-VHS projectors and other HDTV equipment distribute two consistent and synchronized HDMI signal outputs. The single-channel signal output by the user can be connected to audio-visual equipment such as high-definition projectors, DLP, and LCD high-definition televisions at the same time. And it complies with the HDMI1.4 version, and is compatible with the HDCP protocol. It can also display 3D output with 2160 lines of vertical pixels, and supports 3D devices such as Blu-ray and PS3. Make the wonderful 3D world within reach.

### **【Applicable equipment】**

For digital high-definition televisions with HDMI interfaces, plasma displays, LCD displays, set-top boxes, DVD players, Blu-ray players, digital camcorders, audio/video receiving devices, home video, satellite systems, Xbox360, PS/3 playback The connection between the projector and the projector system, signal amplification, multi-screen conversion, multi-screen selection.

### **【Product performance】**

This two-way intelligent HDMI1.4 splitter switch has many features and excellent performance. Among these features you will find:

1. Support 2 HDMI signal sources (DVD player or PS3), 1 HDMI display device or TV;
2. Support 1 HDMI signal source (DVD player or PS3), 2 HDMI display devices or TV;
3. Support the connection between the splitter and the splitter, by stacking, the number of HDMI output ports can be significantly increased;
4. With signal buffering and amplification capabilities, it can easily switch between any 2 channels of 4K HD HDMI signals;
5. Support to extend all HDMI devices by regenerating HDMI signals;
6. Support 3D high-definition video, high-quality, clear, HDTV resolution up to 4K\*2K;
7. Fully comply with HDMI1.4 version, support CEC, compatible with HDCP;
8. No external power supply is required, working current: 15mA;
9. Using AWG26 HDMI standard cable, the input transmission distance can reach 5 meters, and the output transmission distance can reach 5 meters;
10. Manual electronic switch selection, 2 LED indicators for working port display, 3 HDMI connection ports, the corresponding indicator light is on when working;

11. HDMI input and output interface: HDMI Type A 19-pin female;

12. Quick installation, simple operation, plug and play, fashionable design, exquisite and compact, easy to carry.
