

High-power precision soldering station DWS-200

Introduction

DWS-200 is a high-power precision soldering station. It is a hand tool commonly used in electronic welding processes. DWS-200 built-in high-power pure copper transformer, adapts to 110-250V voltage input with many convenient function setting to bring users faster and more accurate operation.

- Fast heating up in 3s
- Support F245/F210 type handles
- Support 3 preset temperatures
- Precise temperature control
- 110-250V wide voltage input
- Languages: English/Chinese

Features

200W
HIGH-POWER INTELLIGENT
PRECISION SOLDERING
STATION

- HIGH POWER RAPID HEATING
- REAL-TIME MONITOR POWER AND TEMPERATURE
- INDUCTION SLEEP
- PRESET 3 TEMPERATURES FOR QUICK CALL

Technical Specifications

Temperature range	100-450°C
Temperature accuracy	±5°C; 2%
Heat-Up time:	3s melt Tin @ 200W
ESD protection	✓
Screen	2.4-inch HD color screen
Working voltage	110~250V
Input fuse	3A

General Characteristics

Product net weight	1505g
Product size	156*96*103mm
Standard carton	68*48*27.5cm
Carton gross weight	16.5kg
Quantity per carton	10PCS
