

### Introduction

FD-10 Bluetooth OBD II diagnostic tool aims to assist with vehicle maintenance for the professional mechanic or a car enthusiast. It can rapidly scan the whole vehicle within 12 core contents which have more than 1000 items, then help users ensure the vehicle is running at its best and catch potential issues before they become obvious problems. It supports wide protocol such as ISO 9141, KWP2000, J1850 PWM, J1850 VPW, and CAN etc.. FD-10 is compatible with both Android and iOS devices and utilizes the latest Bluetooth technology for fast and reliable data transmission.

- Bluetooth 5.1
- 360° full vehicle deeply scanning
- 7 languages

### Application

### Technical Specifications

Protocols supported	SAE J1850 PWM, ISO 9141-2, 14230-4 KWP, 15765-4 CAN
Work voltage	8~28V
Bluetooth version	5.1
Power consumption	≤1W
Software App	YMOBD
Operating system	Android / iOS
Diagnostic functions	Reading and clearing trouble codes / viewing real-time sensor data / performing readiness tests / fuel consumption analysis
Languages	English/Italian/Japanese/Korea/Russian/Spanish/Chinese

### General Characteristics

Product net weight	17.6g
Product size	50*34*27mm
Standard carton	54*32.5*32cm
Carton gross weight	7.3kg
Quantity per carton	200PCS
