

# FGH GSM 900-1800MHZ BOOST KIT V2

## INSTALLATION GUIDE

### STEP 1

Search a place with strong and steady signal on housetop with your mobile phone. Fix up outdoor antenna and make sure it points to signal tower by adjusting its direction.

### STEP 2

Connect outdoor and indoor antenna with cable. Connect outdoor antenna to "BTS" port in repeater through cable.

### STEP 3

Connect indoor antenna(s) to "MOBILE" port in repeater through cable also.

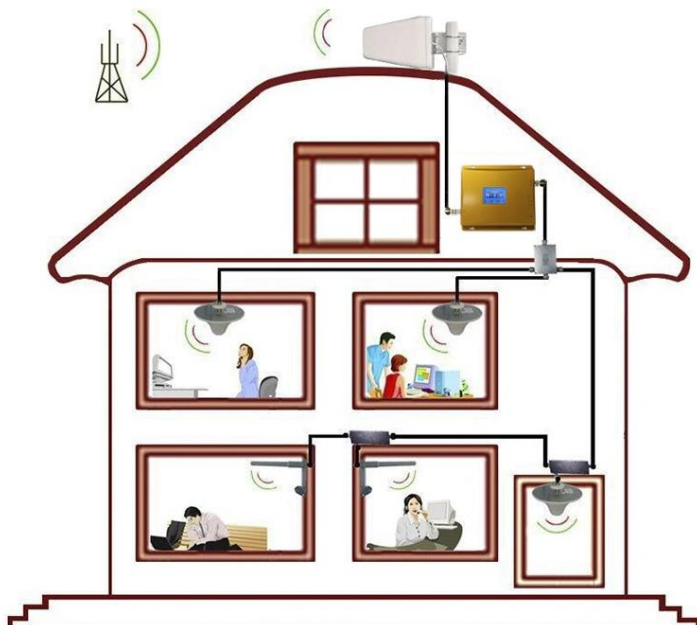

### STEP 4

Plug power adaptor into AC power socket and finish installation.

# FGH GSM 900-1800MHZ BOOST KIT V2

More indoor antennas and splitters/couplers are needed for bigger indoor coverage as one indoor antenna can cover around 100-250 square meters. Installation Diagram for More Indoor Antennas.
