

BS-200

SCHOOL BELL

FEATURES

Metal dome bell generally used in Schools for signalling classbreaks, staff calls, emergency signalling, etc. Also suitable for factories, buildings, hotels and other public spaces where emergency, information or fire signalling is required. The unit can be interconnected to intercom or fire systems and automatically activated.

The alarm is generated by a motor driven by the crankshaft and connecting rod bells. No relays work. High level of reliability.

Robust
Easy to install
Low power consumption
High volume level
Crisp ring-tones

Note:
Not suitable for the Hearing impaired.
