

Expandable Braided Sleeving

POLYESTER - ABSP

Description

ABSP Polyester sleeving offers good abrasion resistance and is flame-retardant and halogen free. The more loosely woven construction enables the sleeving to expand to almost 1½ times its size and allows easier installation on cables, hoses, bulky connectors & plugs.

Applications

- Bundling of cables/wiring in electronic applications
- Vehicle harnesses
- Protection and bundling of tubing and industrial hoses
- Panel/Switchboard manufacturing to route and protect cable, especially where movement is required
