Let us first update to a Cloud update supported version 00170901.

Please find the tool in this zip file : [Cloud update ESP8266 (zip file)]

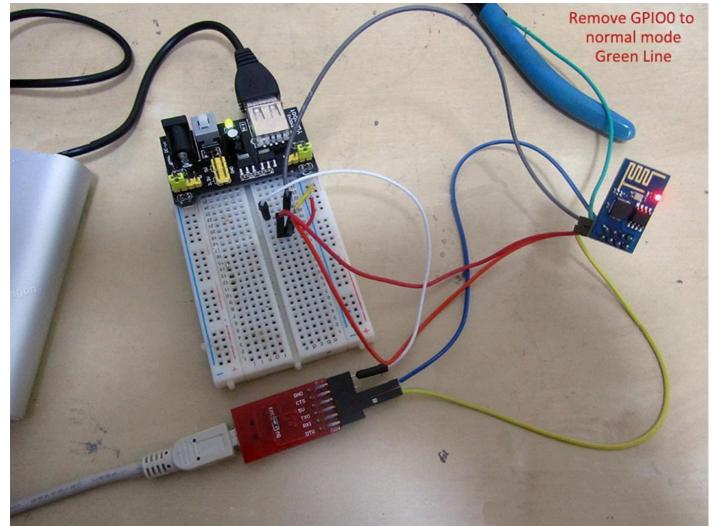

and run the tool, select the bin file and COM port is fine enough.

Follow the wiring like this, I use standalone power and a FTDI basic module with 3v3 setup:

Remove the GPIO0 line to normal running mode

Finally when the cloud updating mode is done, you don't have enter into update mode anymore, just run AT commands to updating via online :

Remember to join your router for internet, and run AT+CIUPDATE to get updates.

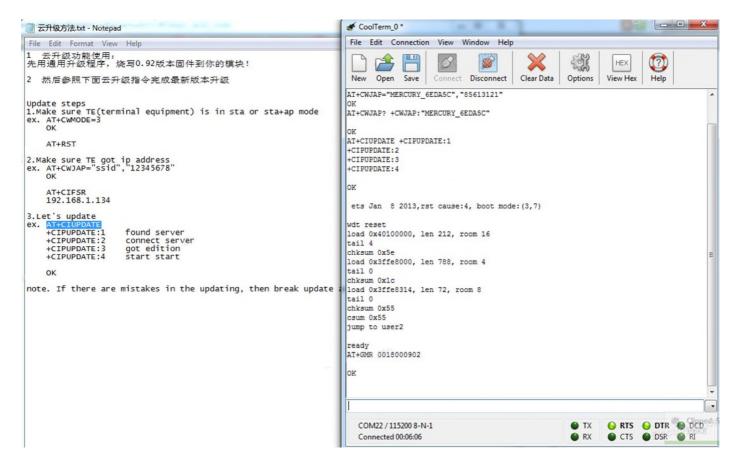

云升级方法.txt - Notepad	
File Edit Format View Help	File Edit Connection View Window Help
1 云升级功能使用: 先用通用升级程序,烧写0.92版本固件到你的模块!	
2 然后参照下面云升级指令完成最新版本升级	New Open Save Connect Disconnect Clear Data Options View Hex Help
update steps 1.Make sure TE(terminal equipment) is in sta or sta+ap mode ex. AT+CWMODE=3 OK AT+RST	OK AI+CWJAP="MERCURY_6EDA5C", "85613121" OK AI+CWJAP? +CWJAP: "MERCURY_6EDA5C"
2.Make sure TE got ip address ex. AT+CWJAP="ssid","12345678" OK AT+CIFSR 192.168.1.134	OK AI+CIUPDATE +CIPUPDATE:1 +CIPUPDATE:2 +CIPUPDATE:3 +CIPUPDATE:4
3.Let's update ex. AT+CIUPDATE +CIPUPDATE:1 found server +CIPUPDATE:2 connect server +CIPUPDATE:3 got edition +CIPUPDATE:4 start start	OK ets Jan 8 2013, rst cause: 4, boot mode: (3,7) wdt reset
ок	load 0x40100000, len 212, room 16
note. If there are mistakes in the updating, then break update	tail 4 chrsum 0x5e load 0x3ffe8000, len 788, room 4 tail 0 chrsum 0x1c load 0x3ffe8314, len 72, room 8 tail 0 chrsum 0x55 csum 0x55 jump to user2 ready
	1

If you don't see "error" feedback (mostly case can be you didn't connect to internet), you should see :

3. Let's update ex. AT+CIUPDATE +CIPUPDATE:1 found server +CIPUPDATE:2 connect server +CIPUPDATE:3 got edition +CIPUPDATE:4 start start

OK

Now here are the final version 00180902:

The new updates include :

AT update :

- 1. based SDK v0.9.2;
- 2. increasing the online update feature, the new command CIUPDATE;
- 3. modify CWLAP instruction supports filtering, increase return information;
- 4. command input end use $\ r \ n$;
- 5. CWMODE do not need to restart after setting;
- 6. other problems corrected;
- 7. the new Technical Support Email support-at@espressif.com;

Don't forget to connect espressif straight, they will help you too!
