

6.1 WIRE WOUND POTENTIOMETERS

Our 3 W potentiometer has proved to be fully competitive in every aspect. Its 3% linearity tolerance makes it useful for sophisticated circuits. Careful design and assembling system provide a good ratio quality/price. Ohmic values according to the E-10 series, but on order we furnish other values too.

6.2 PRINCIPAL CHARACTERISTICS

- * Fast-on terminals 2,9 x 0,5 mm
- * Glasfiber reinforced nylon shaft
- * Standard lenght of the shaft 12 mm
- * Steel shaft any lenght to order
- * Tilting slider providing great endurance
- * Resistance range.: 5 Ω , to 20 k. Ω
- * Rotation angle: 280°
- * Electric angle: 250° \pm 5%
- * Tolerance \pm 10% (\pm 5%)
- * Mech. breakdown of the stop: 8 kpcm.
- * Breakdown voltage over 1000v.
- * Net weight: 27 grs.
- * Packing: 25 pcs. in a carton box
