

HAWK

Access Control & Time and Attendance Reader

The HAWK has fingerprint, RFID card or pin password functionality. Ideal for SME's with a user capacity of 1000. The HAWK can do a basic one door access control application or if configured with the Amatec WOLF controller it will have a fully functional access control system. Typically used for indoor applications i.e. retail stores, small offices, small warehousing, residential application.

The HAWK is bundled with our basic Mi-Time Lite time and attendance software application which can be upgraded to Mi-Time Premier for a full detailed time and attendance application.
