

SPARROW

Access Control & Time and Attendance Reader

The SPARROW reader has fingerprint, RFID card and pin password functionality. Ideal for SME's with a user capacity of 1000. It can do a basic one door access control application or if configured with the Amatec WOLF controller it will have a fully functional access control system.

The SPARROW can be bundled with a mini UPS and a carry case to make it a portable solution for onsite applications, however, it is typically used for indoor.
