

CMU PUSH-PULL SOLENOID 12VDC

Specifications:

Product Name: DC Solenoid Electromagnet
Model: JF-0530B
Rated Voltage: DC 6V
Type: Pull Push
Rated Current: 300mA
Force & Stroke: 5N/10mm
Body Size: 30x16x15mm
Plunger Bar Size: 6x58mm
Mounting Hole Dia.: 2.5mm
Cable Length: 20cm
Material: Metal, Electronic Parts

Description:

1. Pull push type, linear motion, plunger return, DC solenoid electromagnet.
2. DC Solenoid Electromagnet mainly used in vending machines, transport equipment, office facility household appliance, mechanical, etc.
3. Solenoids of this category work externally through pulling pushing in plunger.
4. When energized, doing work through pulling pushing in plunger joined object.

Note: Please do not keep power on for more than about 2 seconds.
