

Technical Data Sheet
CRAMOLIN CLEANER
Art.-No. 102

Appearance:	clear, colourless liquid
Odour:	that of alcohol
Density at 25° C: [g/cm ³]	0,68
Flash point: [° C]	< 0
Residue:	none
Material compatibility:	good
Evaporation:	quick and complete
Viscosity: [cP]	0,72
Surface tension: [mN/m]	22

CLEANER is an accurately balanced mixture of high-quality, powerful solvents. The resulting wetting ability and low surface tension enable **CLEANER** to quickly penetrate surface pores,, removing oil, grease, dirt and other contaminates. It evaporates quickly without leaving any residue. **CLEANER** is of universal use wherever reliable cleaning is required.

Application

CLEANER allows a gentle, but effective cleaning of electromechanical contacts, relays, components, and equipment. It is particularly suitable for precision instruments and delicate electronic components. Further it is a good substitute for, or complement to, ultrasonic cleaning and vapor degreasing. **CLEANER** contains no CFC or chlorinated solvents and therefore it is safe to use on paints, plastics and rubbers.

Directions

Spray **CLEANER** accurately on surfaces to be cleaned. Ensure uniform wetting of these surfaces. Adjust quantity of **CLEANER** to degree of dirtiness. For spots of difficult access, use the attached extension tube.

Warning

Do not use **CLEANER on components under voltage. Prior to switching on the appliances, allow for solvents to evaporate.**

Note: Although the information and recommendations set forth herein are presented in good faith and believed to be correct as of the date hereof, CRAMOLIN makes no representation as to the completeness or accuracy thereof. Information is supplied upon the conditions that the persons receiving the same will make their own as to its safety and suitability for their purpose prior to use. In no event will CRAMOLIN be responsible for damages of any nature whatsoever resulting from the use of or reliance upon information.
