

Enclosures - powder coated metal

A powder coated metal enclosure which is ideal for housing energisers and accessories. It is weatherproof and can be used outdoors. It has an inspection window for easy viewing of the energiser status without having to unlock the box.

This box is mostly used inland due to its powder coated finish. For coastal use we recommend the aluminium or fibreglass enclosures.

Features

- Inspection window for viewing without opening the door
- Wooden electrically isolated backing plate for mounting the energizers and accessories
- Available in different sizes

Specifications:

Finish: Powder coated metal box with clear plastic inspection window. Wooden backing board

Sizes:

H460 x W305 x D230

H600 x W460 x D230
