

Description:

Item Name: Lipo battery level display board

Input Voltage: 9-26V

Dimension: 30*15*3mm

Weight: 1.3g

Usage: Suitable for 3S 11.1V 12V 12.6V Lipo Battery

Electrical Parameters:

	Min. Value	Typical Value	Max. Value	Unit
Standby Current(SW=OFF)	0	0	0	μA
Working Current	5	20	25	mA
Input Voltage	9	12.6	26	V
Display Precision	0.5	1	2	%
25% Voltage Range	10		10.7	V
50% Voltage Range	10.7		11.3	V
75% Voltage Range	11.3		11.9	V
100% Voltage Range	11.9		12.6	V
Ambient Temperature	-40	25	85	°C

Features:

4 LEDs indicator display

±1% Precision

Note:

DO NOT reverse connect the positive and negative

Press the button to display the battery level

Welding short-circuit the left and right pins of the button to make the board always shows the battery level.

Package Included:

10x Lipo Battery Level Display Indicator Board
