Technical Data

MT188

The new MT188 meter is designed to provide trouble shooting solutions to the most complicated problems encountered with today's sophisticated automotive electronic systems. This meter is supplied with an Inductive Pick-up which converts the magnetic field generated by the spark plug wire into a pulse that triggers the meter's RPM measurement for either 2 or 4 cycle automotive engines.

Features Include:

- RPM measurement for automotive engines with 2 to 10 cylinders using the inductive pick-up
- 14 Test functions including DCV, ACV, DCA, ACA, Resistance, RPM(Tach), Dwell Angle, Duty Cycle, Frequency, Temperature with IR Probe, Temperature with K-Type probe, Capacitance, Continuity and Diode Check
- Read Pulse Duty cycle and dwell angle for electronic fuel injection feedback, carburetors and ignition
- Millisecond Pulse Width function to test on-time of fuel injectors, idle air control motors, and electronic transmission controls
- Selectable between 2 and 4 stroke engines
- IR Temperature adaptor to 550°C
- Peak Hold function – measures Peak Max and Peak Min
- Data Hold
- 4000 count LCD with bargraph and backlight
- MIN/MAX Record
- Auto power off
- Fused current inputs and overload protection on all ranges
- IP67 Housing
