

# Switching Mode Battery Charger

## Specifications

Input voltage: 110 - 240V AC

Output: 6V/12V

Output current: 0.5 - 3A

## Features

- For 6V/12V lead-acid batteries of 4...40Ah capacity
- Compact battery charger with lightweight switch-mode PSU for fast charging 6V and 12V drive batteries as well as pit-box and starter batteries
- Auto detect 6V or 12V Lead Acid battery and apply the charging current accordingly.
- LED Indicator: Red = Charging,
- LED Indicator: Green= Charged
