

Making alarms **smart**

System overview

Product Highlights

QUICK INSTALLATION

The Olarm device is installed in minutes, with no programming required.

CUSTOMER APP

The customer app gives full control of the alarm, with instant push notifications for all arming/disarming/ and trigger events.

SELF SERVICE

The customer adds the Olarm to their app using the unique serial code. The customer can add and remove users to the alarm as they please.

MONITORING

Olarm supplies a free dual sim router with no monthly service fees. Olarm supports all monitoring programs using standard decoder formats.

BABYWARE INTEGRATION

Program alarm panels remotely using babyware.

ALARM MANAGEMENT

Set the Receiver Account Code for each Olarm device through your management tool. The account code is to link an Olarm to your clients account in your monitoring solution.

FAIL TO TEST

Receive contact ID message in the control room when the Olarm as not been able to contact the server.

SUSPEND CLIENTS APP

Suspend the app service to non-paying customers. Turn the app back on when they pay.

RICH HISTORY LOGS

Backup signal monitoring. If your control experiences general issues, you may view the Olarm signals on our web platform.

VIEW ZONE NAMES

When installed the Olarm downloads all the zone names to the app and management tool. The management tool keeps track of the zone names in the app if the customer changes them.

ALWAYS CONNECTED

The Olarm device reports is online at all times, ready to send signals as they are generated by the panel.

COMING SOON

FULL CONTROL

Access to all programmed partitions

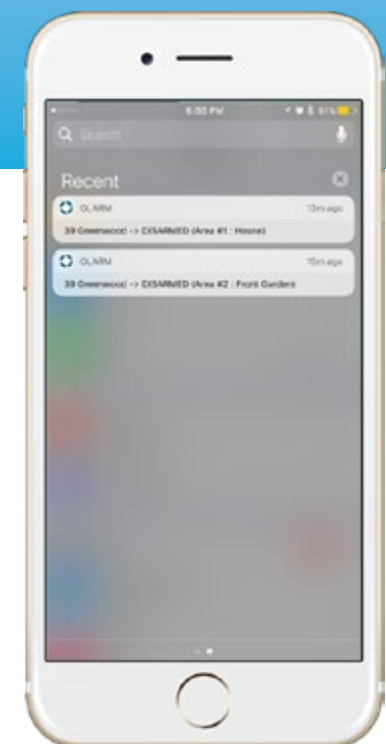

REAL TIME ZONES

View all zone activity in real time

EVENT HISTORY

All alarm events including zone activity

PUSH NOTIFICATIONS

Sent instantly to the phones notification screen

The dashboard

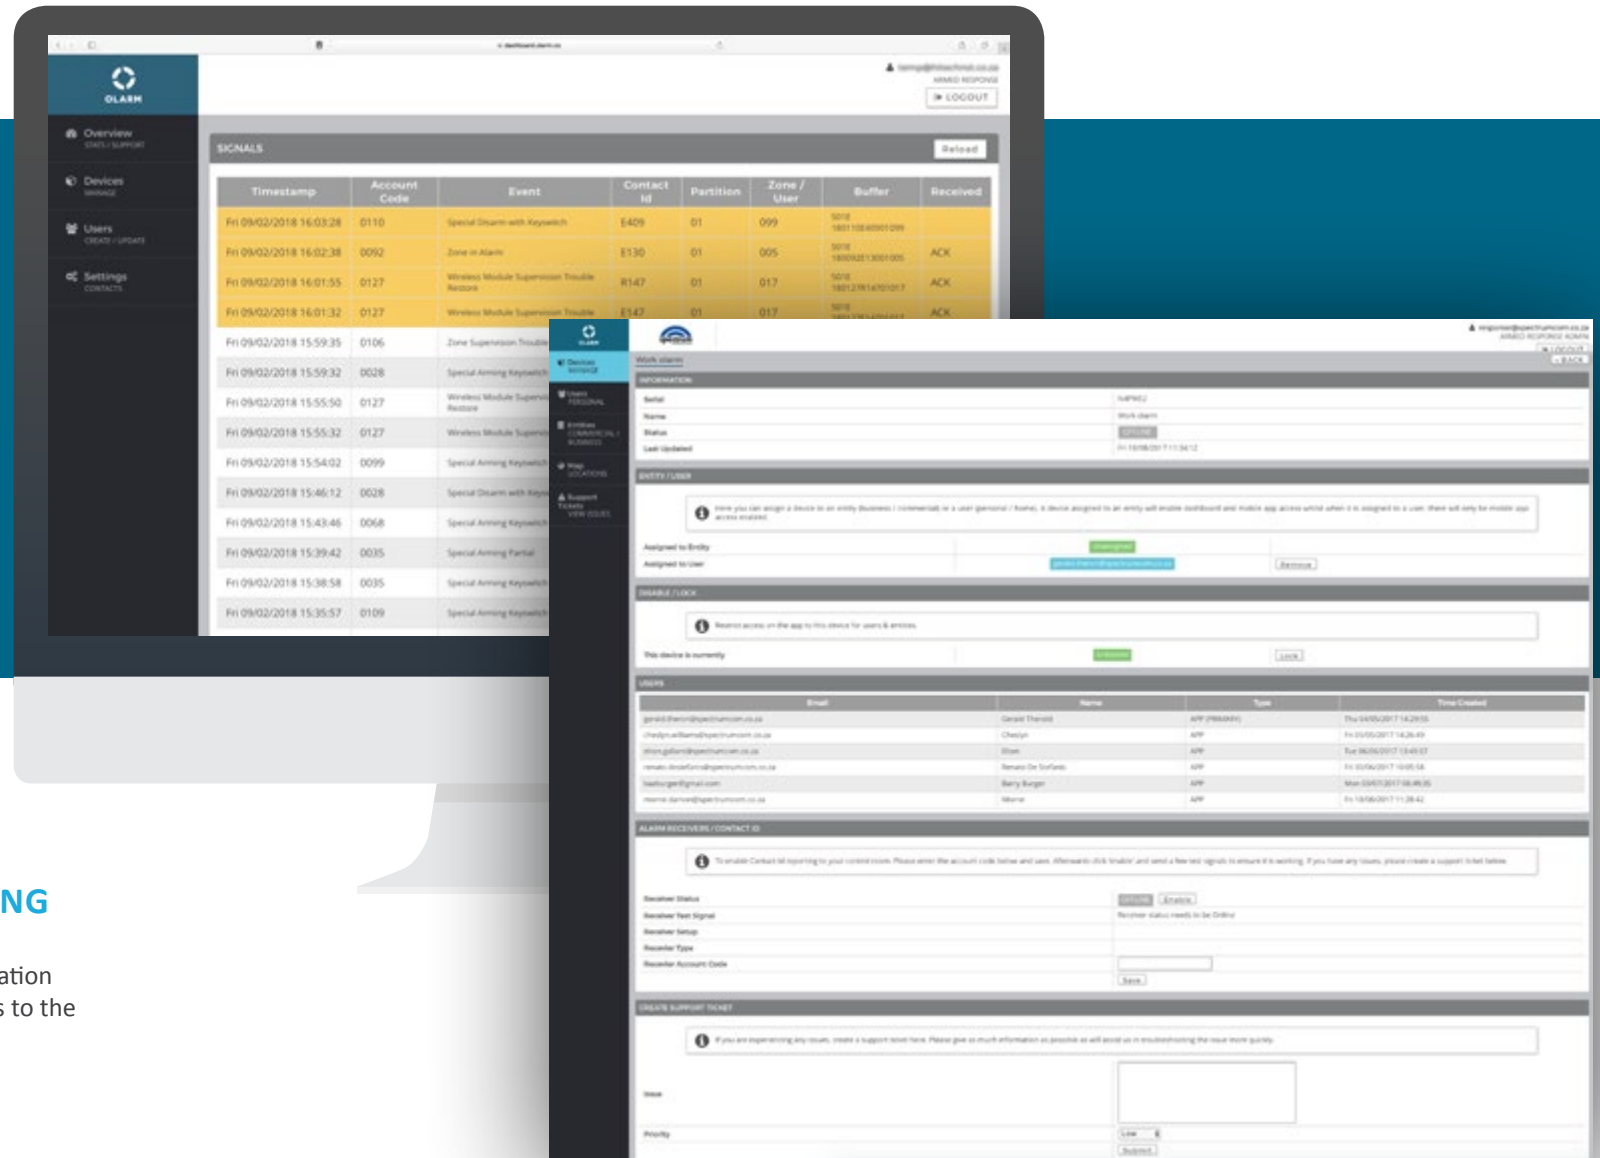

STANDARD INTEGRATION

The Olarm devices integrate easily into your existing monitoring software. In most cases we recommend you obtain a free dual sim router from Olarm which plugs into your monitoring servers serial port. You may also elect to use your existing IP connection.

We created the dashboard to compliment your monitoring software and take advantage of the extensive data the Olarm device reports.

BACKUP SIGNAL MONITORING

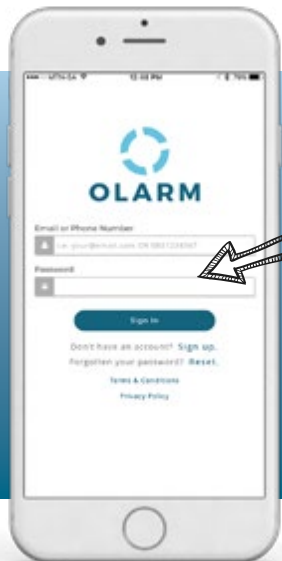

The Olarm device reports all zone information in realtime. View all of your Olarm signals to the control room on one page.

Getting started

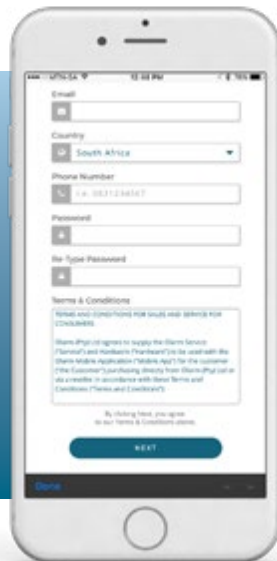

1 SIGN UP

To link to your new Olarm device, you need to create an account. Click sign up.

2 ACCOUNT DETAILS

Fill in your details, taking care to enter them correctly. Click next when complete.

3 ONE TIME PIN

A one time pin is SMS'd to your phone. Retrieve it from your messages and enter it here. If you do not receive the OTP, wait ten minutes and then go back to step 1.

4 LOGIN

Your account has now been created, and you are ready to login. Enter your new details and click "Sign in"

5 ADD ALARM

Your Olarm device has a unique serial number.

To add your Olarm to your app account, retrieve the Serial number from the cardboard box or from the back of the Olarm device.

6 SERIAL NUMBER

Enter your unique serial number, and give your alarm a name.

You are now the primary account holder, and another user may only be granted access by you.

DOWNLOADING THE APP

For Android users, go the Google Play store and search for 'Olarm1'
For Apple users, go to the Apple Store and search for 'Olarm'

Easy to use

ADDING MORE USERS

As the primary account holder, you may now add more users.

Before you start: Each user needs to sign up for an Olarm account by going through steps 1 to 4.

Go to the settings page of the Olarm app. Under the "Manage users" heading, enter the cell number of the user you wish to add. Then click "grant".

BYPASS INDIVIDUAL ZONES

Click this bypass button. The zone will highlight blue on success

The app home screen shows all the areas available for control

Send commands to each area using one of these options

** Sleep arm is not available on the EVO model*

Access your full zone information

See a full history of all activity
