

## SMART TECHNICAL DATA

| SPECIFICATION              | PARAMETER                    |
|----------------------------|------------------------------|
| Net weight / Gross weight  | 10 kg / 13kg                 |
| The minimum load           | 20kg                         |
| The maximum load           | 100kg                        |
| The highest speed per hour | 10km/h                       |
| The maximum mileage        | 15-20km                      |
| Maximum climbing angle     | 15 degree                    |
| Turning radius             | 0                            |
| Power                      | Rechargeable lithium battery |
| Voltage                    | 100-240V                     |
| Product size               | L584mm*W220mm*H178mm         |
| Carton size                | L660mm*W290mm*H250mm         |
| Chassis height             | 25MM                         |
| The pedal height           | 120MM                        |
| Tire                       | Non inflatable hollow        |
| Tire diameter              | 8.6 inch                     |
| Battery                    | 36V ,4.4AH                   |
