

Overview

Sonoff iFan02 is a driver for ceiling fans with lights. By replacing the old driver with iFan02, your non-smart led ceiling fan will be converted to a smart ceiling fan. It allows you remote control ceiling fan with led light on the free iOS/Android app eWeLink. You can turn on/off the fan, turn on/off the light, change fan speed for the WiFi ceiling fan. iFan02 works with Amazon Echo and Google Home, you can use your voice to turn on/off the fan or light, but please note that you can not change fan speed with voice, google and alexa don't not provide ways to do that.

The iFan02 comes with a 2.4G RF Remote, with whom you can turn on/off the fan and light, adjust fan speed indoors.

SONOFF iFan02

WiFi Smart Driver for LED Ceiling Fan

- Remote Control
- 3 Fan Speeds
- Timing Schedules
- RF Remote Control

Directly replace your old driver, convert your traditional ceiling fan with light to a smart control fan.

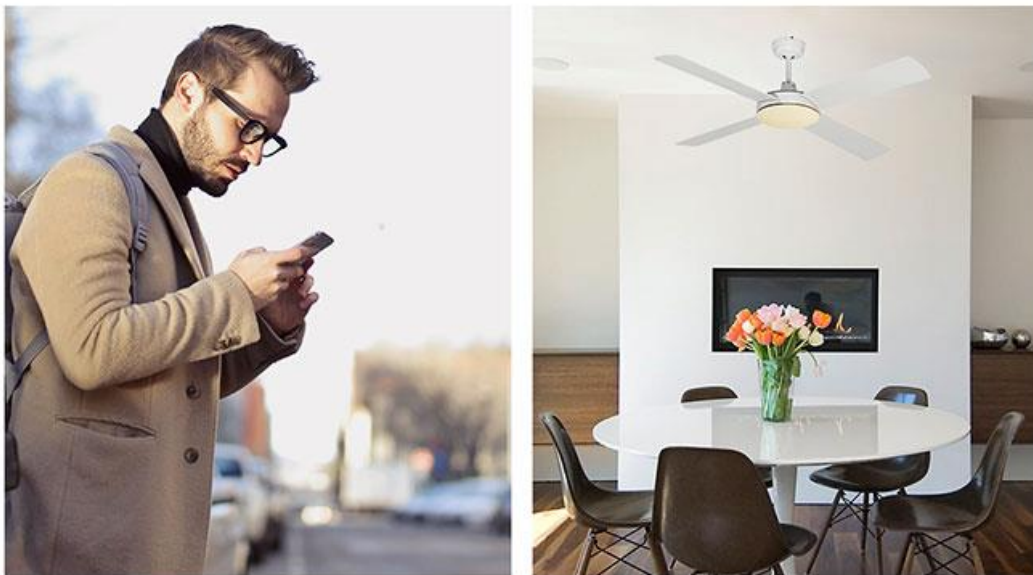

Easy Upgrade Non-smart LED Ceiling Fan

Simply replace the original driver of your non-smart LED ceiling fan with iFan02 driver, you'll get a smart LED ceiling fan. The smart fan allows you to use the app to remote control the blade speed, schedule the light on or off at a specified time.

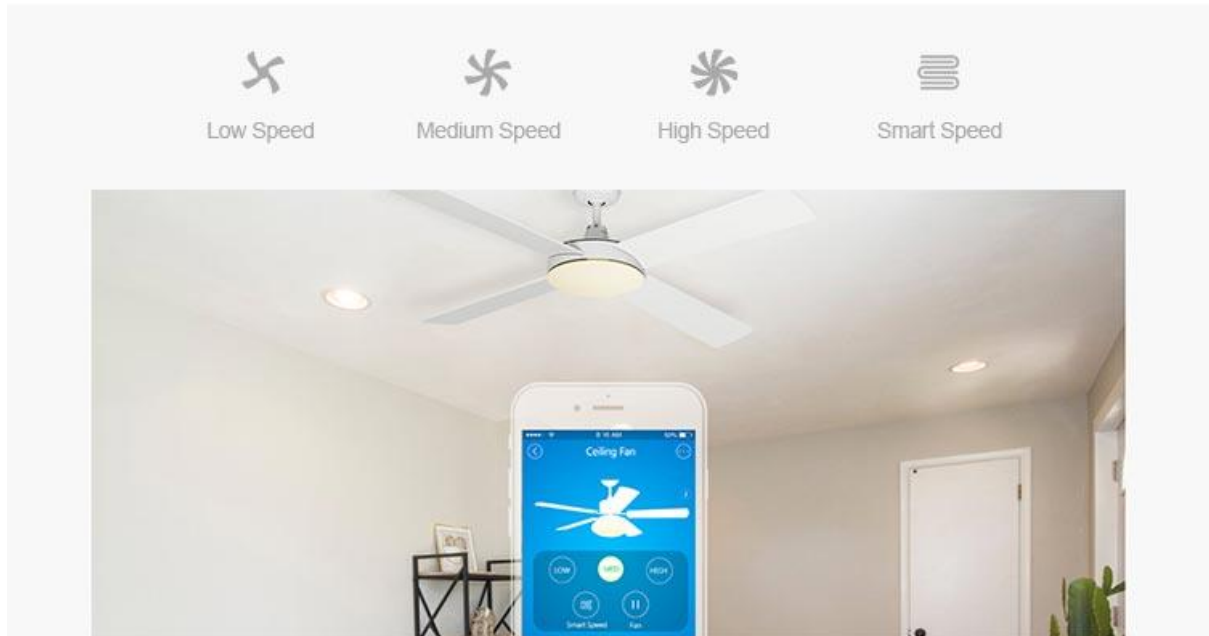

Remote Control from Anywhere

Using the free iOS and Android eWeLink app, you can view real-time device status and turn on or off the LED light and fan from anywhere at any time.

Adjustable Fan Speed

There are 3 fan speed available: LOW, MED, HIGH. You can adjust the fan speed on the app to keep yourself comfortable in the room.

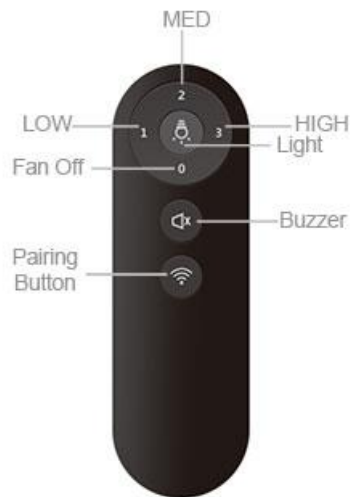

Turn Your Light ON/OFF with Schedule Timers

The schedule timer allows you to schedule the lights on or off at a specified time. Create desired schedules for the light while you are away, making your house appear occupied and keeping the burglars away.

Control With 2.4G RF Remote

The iFan02 comes with a 2.4G RF Remote. When you can't find your phone or your Wi-Fi doesn't have Internet access, you can still use the 2.4G RF Remote to turn on/off the fan, adjust fan speed indoors.
