

## Products Features

- 4 channel of frequency adjustment active infrared double beam.
- Selectable beam frequency,suitable for long distance and stack use,strong anti-interference ability.
- LED digital tube display received signal strength,easy to debug.
- Fully sealed design,rain-proof(fog),dust-proof(worm).
- High levels of anti-RFI/EMI capability.
- Professional anti-jamming optical housing.

## Technical Specifications

### Physical Characteristics

Working voltage	DC12-24V
Working current	90mA max
Detecting distance	40m 60m 100m
Frequencies	4 channel
Alarm Output	NO & NC
Beam adjustment	Horizontal:180°(±90°) Vertical:90°(±10°)
Installation place	Outdoor/indoor
Working temperature	-25°C~+55°C
Dimension	171*82*80mm
